

MOTORIZED TOOLBOX

DISTINCTIVE FEATURES

- Easy and safe transportation over long distances
- Reduced risk of musculoskeletal disorder (MSD)
- Automatic braking via an electromagnetic brake system
- Three maximum speeds
- Easy to use
- Made in North America

FROM A TO B SAFELY
AND SECURELY

MOTORIZED TOOLBOX

IDEAL TOOLBOX FOR A RANGE OF ENVIRONMENTS

MOVE ABOUT EFFORTLESSLY

Our motorized toolbox was specially designed to safely transport heavy loads over long distances. With variable speeds, emergency stop, automatic stop, horn, our One-Drawer-at-a-Time System and integrated lock-in mechanism, all our user safety features have been integrated to prevent collisions with people and surrounding objects. Upon releasing the handle, the electromagnetic brakes stop the toolbox immediately on both flat and sloped surfaces. Your employees will also appreciate how easy and smooth transportation is thanks to the polyurethane ball-bearing wheels paired with separate motorized wheels. This greatly reduces physical effort and risk of injury, which helps to promote employee retention.

MAINTAIN AN ERGONOMIC POSTURE

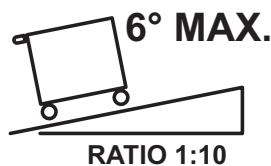

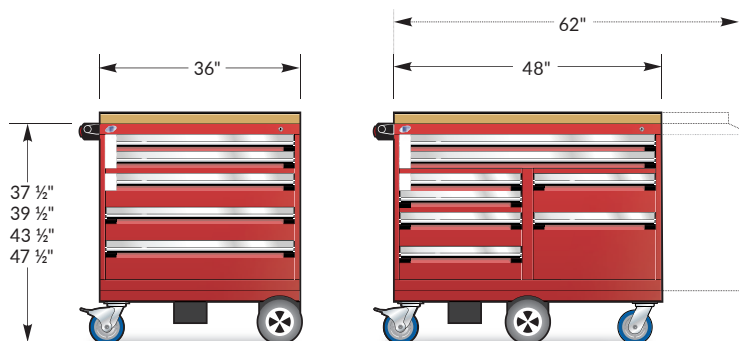

OBJECTIVE: PREVENT MUSCULOSKELETAL DISORDER (MSD)

With a capacity of 400lb. per drawer and a lifetime warranty on the sliding mechanism, Rousseau toolboxes are market-leading products. They are also completely customizable, including a choice of 20 standard colors, dimensions, work surfaces, drawer compartments and corner bumpers.

With Rousseau motorized toolboxes, you can transport large loads incredibly safely and securely. When considering monetary and human costs – as well as the short-, medium- and long-term effects of MSD – a motorized toolbox is a wise choice.

EFFICIENT STORAGE FOR YOUR EQUIPMENT

- The motorized toolbox can climb slopes of up to 6°.
- This is equivalent to a ratio of about 1 in 10 (vertical:horizontal).

SPECIFICATIONS

36"W cabinet: 800 lb.
48"W cabinet: 1,500 lb.
