

HOLDING CELLS & SECURED STORAGE

WireCrafters

ECONOMICAL WIRE PARTITION STORAGE ENCLOSURES

IDEAL FOR

Evidence and Ordnance Lockup | Controlled Access Storage Rooms | Inventory Control | Holding Cells

WireCrafters wire partition system is used to build prisoner holding cells in police stations, courthouses & correctional facilities across the country. Our modular sized panels can be used to construct nearly any size enclosure. Generally a four-sided cell with 3' x 7' hinged door and ceiling is installed. Two or three sided cells may be installed where existing building walls are secure. Wire mesh ceiling panels are optional.

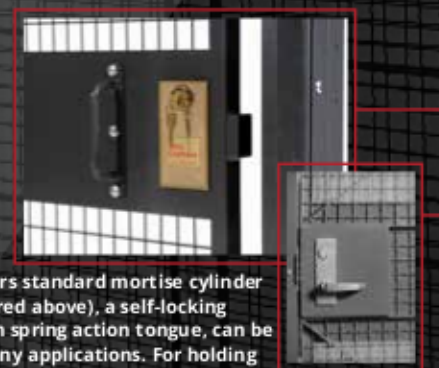

This application requires our heavy 3/8" assembly hardware to be installed on the outside of the enclosure.

Heavy Duty Options

The system standards may be upgraded with any of the following:

- Heavier 1-1/2" x 1-1/2" 8 gauge woven wire mesh.
- Tamperproof assembly hardware.
- Larger 1-1/2" x 1-1/2" x 1/8" steel angle panel frames.

LOCKS

WireCrafters standard mortise cylinder lock (pictured above), a self-locking device with spring action tongue, can be used in many applications. For holding cells we also offer an institutional high security dead latch lock.

SECURED STORAGE

WireCrafters wire partition system is ideal for creating secured storage areas. Rooms of any size or height can be constructed from our twenty standard size panels. A full line of hinged and sliding doors are available to meet your requirements. Customer designed, and standard slide-up service windows with counter are available for controlled issue stations.

TYPICAL APPLICATIONS

EVIDENCE ROOMS

TOOL STORAGE

TACTICAL GEAR STORAGE

ADDITIONAL APPLICATIONS

- Munitions Storage
- Office File Archives
- Motor Pool Parts Areas
- Maintenance Cages

STANDARD SPECIFICATIONS

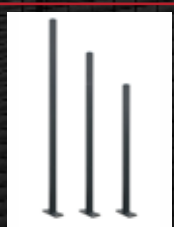

PANELS

- 2" x 1" 10 gauge woven wire mesh
- 1-1/4" x 1-1/4" x 1/8" steel angle frame
- 8' & 10' high panels

DOORS

- 2" x 1" 10 gauge woven wire mesh
- 1-1/4" x 1-1/4" x 3/16" steel angle frame
- Hinged & sliding doors available

POSTS

- 2" x 2" x 14 gauge steel tubing
- 2" x 7" x 1/4" steel base plates
- 8'-5 1/4", 10'-5 1/4" & 12'-5 1/4" heights

BENCHES

- Formed 10 gauge sheet metal
- 4', 6' & 8' lengths
- 1" diameter handcuff rail available
